## Section 2. Hazards identification

| Health hazards        | : | May be harmful if swallowed. Causes severe skin burns and eye damage. May cause an allergic skin reaction. Causes serious eye damage. Suspected of causing genetic defects. May damage fertility or the unborn child. |
|-----------------------|---|---|
| Environmental hazards | : | Farmful to aquatic life. Toxic to aquatic life with long lasting effects.   |

Other hazards which do not : None known. result in classification

### Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

| Ingredient name  | %          | CAS number              |
|--|------------|-------------------------|
| butan-2-ol   | ≥10 - <20  | 78-92-2                 |
| nitroethane  | ≥10 - ≤15  | 79-24-3                 |
| reaction product: bisphenol-A-(epichlorhydrin); epoxy resin                        | ≤10        | 25068-38-6              |
| 1,3-Propanediol, 2-ethyl-2-(hydroxymethyl)-, polymer with 2-(chloromethyl) oxirane | ≤9         | 30499-70-8              |
| Terphenyl, hydrogenated  | ≤5         | 61788-32-7              |
| benzyl alcohol   | ≤4         | 100-51-6                |
| Amines, polyethylenepoly-, triethylenetetramine fraction zinc oxide                | ≤2<br>≤1.5 | 90640-67-8<br>1314-13-2 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
|--------------|---|
| Inhalation   | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | : Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |

| Ingestion | : Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. Remove victim to fresh air and keep at<br>rest in a position comfortable for breathing. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
|-----------|--|
|           |  |

#### Most important symptoms/effects, acute and delayed

| -                              |   |
|--------------------------------|---|
| Potential acute health effe    | <u>cts</u>  |
| Eye contact                    | : Causes serious eye damage.  |
| Inhalation                     | : No known significant effects or critical hazards.   |
| Skin contact                   | : Causes severe burns. May cause an allergic skin reaction.   |
| Ingestion                      | : May be harmful if swallowed.  |
| <u>Over-exposure signs/sym</u> | <u>otoms</u>  |
| Eye contact                    | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                     | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |
| Skin contact                   | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |
| Ingestion                      | : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |
| Indication of immediate me     | dical attention and special treatment needed, if necessary  |
| Notes to physician             | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments            | : No specific treatment.  |
| Desta attant of flood at dama  | A bit is the set of the bit of the set of |

**Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

#### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                              |  |      |
|--|--|------|
| Suitable extinguishing media                     | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |      |
| Unsuitable extinguishing<br>media                | g : Do not use water jet.  |      |
| Specific hazards arising from the chemical       | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, w<br>the risk of a subsequent explosion. This material is toxic to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |      |
| Hazardous thermal decomposition products         | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>halogenated compounds<br>metal oxide/oxides   |      |
| Special protective actions for fire-fighters     | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident<br/>there is a fire. No action shall be taken involving any personal risk or without<br/>suitable training. Move containers from fire area if this can be done without risk.<br/>Use water spray to keep fire-exposed containers cool.</li> </ul>  | t if |
| Special protective<br>equipment for fire-fighter | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.</li> </ul>  |      |
|  | mode.  |      |

## Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel                            | Evacuate<br>entering.<br>No flares,<br>adequate<br>Put on ap     | shall be taken involving any personal risk or<br>surrounding areas. Keep unnecessary and<br>Do not touch or walk through spilled materia<br>smoking or flames in hazard area. Do not b<br>ventilation. Wear appropriate respirator whe<br>propriate personal protective equipment.  | unprotected personnel from<br>II. Shut off all ignition sources.<br>preathe vapor or mist. Provide<br>en ventilation is inadequate.                      |
|---|--|---|--|
| For emergency responders                                  | informatio   | red clothing is required to deal with the spilla<br>n in Section 8 on suitable and unsuitable ma<br>n in "For non-emergency personnel".   | <b>.</b> .   |
| Environmental precautions<br>Methods and materials for co | drains and<br>environme<br>May be ha                             | ersal of spilled material and runoff and conta<br>I sewers. Inform the relevant authorities if the<br>ental pollution (sewers, waterways, soil or air<br>rmful to the environment if released in large  | ne product has caused<br>).  Water polluting material.   |
|   |  | • •   |  |
| Small spill   | explosion<br>Alternative   | if without risk. Move containers from spill ar<br>proof equipment. Dilute with water and mop<br>ely, or if water-insoluble, absorb with an inert<br>e waste disposal container. Dispose of via a  | o up if water-soluble.<br>dry material and place in an   |
| Large spill   | explosion<br>sewers, w<br>effluent tro<br>combustit<br>and place | if without risk. Move containers from spill ar<br>proof equipment. Approach release from up<br>ater courses, basements or confined areas.<br>eatment plant or proceed as follows. Contain<br>le, absorbent material e.g. sand, earth, verm<br>in container for disposal according to local m<br>f via a licensed waste disposal contractor. | wind. Prevent entry into<br>Wash spillages into an<br>n and collect spillage with non-<br>niculite or diatomaceous earth<br>egulations (see Section 13). |
| Date of issue/Date of revision                            | : 21-10-202  | 2 Version : 2.01  |  |
| Date of previous issue                                    | : 5-10-2022  | 5/14  | AkzoNobel  |

### Section 6. Accidental release measures

material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                  |   | Exposure limits   |                            |
|----------------------------------|---|---|----------------------------|
| butan-2-ol                       |   | ACGIH TLV (United States, 3,<br>TWA: 303 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours.  | /2020).                    |
| nitroethane                      |   | GBZ 2.1 (China, 8/2019).<br>PC-TWA: 300 mg/m <sup>3</sup> 8 hours   |                            |
| Terphenyl, hydrogenated          |   | ACGIH TLV (United States, 3<br>TWA: 0.5 ppm 8 hours.<br>TWA: 4.9 mg/m <sup>3</sup> 8 hours.   |                            |
| Appropriate engineering controls | ventilation or other engine                           | entilation. Use process enclosures, local ex<br>eering controls to keep worker exposure to a<br>recommended or statutory limits. The engine<br>apor or dust concentrations below any lower<br>of ventilation equipment. | irborne<br>eering controls |
|                                  | Emissions from ventilation                            |   |                            |
| Environmental exposure controls  | they comply with the requ<br>cases, fume scrubbers, f | n or work process equipment should be chech<br>irements of environmental protection legislar<br>lters or engineering modifications to the proc<br>ary to reduce emissions to acceptable levels                          | tion. In some<br>cess      |
| •                                | they comply with the requ<br>cases, fume scrubbers, f | irements of environmental protection legisla<br>lters or engineering modifications to the proc  | tion. In some<br>cess      |

### Section 8. Exposure controls/personal protection

#### Individual protection measures

| Hygiene measures       | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
|------------------------|---|
| Eye/face protection    | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.  |
| Skin protection        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

### **Section 9. Physical and chemical properties**

#### Appearance

| Appearance                                      |  |                             |             |
|---|--|-----------------------------|-------------|

| Decomposition temperature                  | : Not available.   |    |
| Viscosity                                  | : Kinematic (room temperature): 4.45 cm <sup>2</sup> /s<br>Kinematic (40°C): 1.01 cm <sup>2</sup> /s |    |

\* typical value, figure may vary with colour, etc

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidizing materials   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |
|                                    |   |

### Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

| Product/ingredient name       | Result                | Species    | Dose                    | Exposure |
|-------------------------------|-----------------------|------------|-------------------------|----------|
| butan-2-ol                    | LC50 Inhalation Gas.  | Rat        | 8000 ppm                | 4 hours  |

#### **Other adverse effects** : No known significant effects or critical hazards.

### Section 13. Disposal considerations

#### **Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or

### Section 13. Disposal considerations

landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

|  | (   | China   | IMDG   | IATA   |
|--|---|---|--|--|
| UN number                                  | UN3469  |   | UN3469   | UN3469   |

### Section 15. Regulatory information

#### China inventory (IECSC) : Not determined.

List of Goods banned for Importing

None of the components are listed.

#### List of Goods banned for Exporting

None of the components are listed.

#### List of Toxic Chemicals Severely Restricted for Importing & Exporting by China

None of the components are listed.

#### **Inventory of Highly Toxic Articles**

None of the components are listed.

#### Catalogue of Hazardous Chemicals of Priority Management

None of the components are listed.

#### **Catalogue of Occupational Disease Hazard Factors - Dust**

| Ingredient name                          | Status |
|--|--------|
| titanium dioxide                         | Listed |
| Talc , not containing asbestiform fibres | Listed |

#### **Catalogue of Occupational Disease Hazard Factors - Chemical Factors**

| Ingredient name | Status |
|-----------------|--------|
| nitroethane     | Listed |
| zinc oxide      | Listed |

### Section 16. Other information

#### rocedure used to derive the classification

| Date of issue/Date of revision |
|--------------------------------|
| Date of previous issue         |

### Section 16. Other information

| Classification                                  | Justification         |
|---|-----------------------|
| FLAMMABLE LIQUIDS - Category 3                  | On basis of test data |
| ACUTE TOXICITY (oral) - Category 5              | Calculation method    |
| SKIN CORROSION/IRRITATION - Category 1C         | Calculation method    |
| SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1 | Calculation method    |
| SKIN SENSITIZATION - Category 1                 | Calculation method    |
| GERM CELL MUTAGENICITY - Category 2             | Calculation method    |
| TOXIC TO REPRODUCTION - Category 1B             | Calculation method    |
| AQUATIC HAZARD (ACUTE) - Category 3             | Calculation method    |
| AQUATIC HAZARD (LONG-TERM) - Category 2         | Calculation method    |

#### Notice to reader

#### FOR PROFESSIONAL USE ONLY

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
