

# SAFETY DATA SHEET

**FR-PREPRIME BASE** 

: Product identifier

: SDS code

## **Section 1. Identification**

**FR-PREPRIME BASE** 6120000B

#### Recommended use of the chemical and restrictions on use

Identified uses Waterborne paint. Professional use Industrial use All other uses Filler for interior use : Product use Supplier's details MAPAERO SAS 10, Avenue de la Rijole CS30098 09103 PAMIERS Cedex France : Importer PSRA PAMIERS@akzonobel.com : e-mail address of person responsible for this SDS +33 (0)5 34 01 34 01 : Emergency telephone +33 (0)5 61 60 23 30 number Section 2. Hazard identification SKIN SENSITIZATION - Category 1 : Classification of the AQUATIC HAZARD (ACUTE) - Category 3 substance or mixture AQUATIC HAZARD (LONG-TERM) - Category 3 **GHS** label elements : Hazard pictograms Warning : Signal word May cause an allergic skin reaction. : Hazard statements Harmful to aquatic life with long lasting effects. **Precautionary statements** Wear protective gloves. Avoid release to the environment. Avoid breathing vapor. : Prevention Take off contaminated clothing and wash it before reuse. IF ON SKIN: Wash with : Response plenty of water. If skin irritation or rash occurs: Get medical advice or attention. Not applicable. : Storage Dispose of contents and container in accordance with all local, regional, national : Disposal and international regulations.

: 6-10-2022 : 30-9-2022

# Version : 1.01 2/9

# : Other hazards which do not result in classification

## None known.

Section 2. Hazard identification

## **Section 3. Composition/information on ingredients**

Mixture
---------

FR-PREPRIME BASE

: Substance/mixture

CAS number	%	Ingredient name
55965-84-9	<0.025	C(M)IT/MIT(3:1)

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

Description of necessary first aid measures	
Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.	: Eye contact
Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.	: Inhalation
Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.	: Skin contact
Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.	: Ingestion
Most important symptoms/effects, acute and delayed	
Potential acute health effects	
No known significant effects or critical hazards.	: Eye contact
No known significant effects or critical hazards.	: Inhalation
May cause an allergic skin reaction.	: Skin contact
No known significant effects or critical hazards.	: Ingestion
Over-exposure signs/symptoms	
No specific data.	: Eye contact
No specific data.	: Inhalation

## Section 4. First aid measures

Adverse symptoms may include the following: irritation redness	: Skin contact
No specific data.	: Ingestion
Indication of immediate medical attention and special treatment needed, if neo	cessary
Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.	: Notes to physician
No specific treatment.	: Specific treatments

No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

: Protection of first-aiders

#### See toxicological information (Section 11)

Section 5. Fire-fighting measures		
Extinguishing media		
Use an extinguishing agent suitable for the surrounding fire.	:	Suitable extinguishing media
None known.		Unsuitable extinguishing media
n a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.		Specific hazards arising from the chemical
Decomposition products may include the following materials: carbon dioxide carbon monoxide nalogenated compounds metal oxide/oxides	:	Hazardous thermal decomposition products
Promptly isolate the scene by removing all persons from the vicinity of the incident if here is a fire. No action shall be taken involving any personal risk or without suitable training.		Special protective actions for fire-fighters
Fire-fighters should wear appropriate protective equipment and self-contained preathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.		Special protective equipment for fire-fighters
Section 6. Accidental release measures		
Personal precautions, protective equipment and emergency procedures		
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.	:	For non-emergency personnel
If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".	:	For emergency responders
Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material.	:	Environmental precautions

Date of issue/Date of revision	: 6-10-2022	Version : 1.01	
Date of previous issue	: 30-9-2022	3/9	AkzoNobel

May be harmful to the environment if released in large quantities.

## Section 6. Accidental release measures

#### Methods and materials for containment and cleaning up

Stop leak if without risk. Move containers from spill area. Dilute with water and mop : **Small spill** up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

#### Precautions for safe handling

Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls/personal protection

#### Control parameters

#### Occupational exposure limits

None.

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

- : Appropriate engineering controls
- : Environmental exposure controls

- : Protective measures
- : Advice on general occupational hygiene
- : Conditions for safe storage, including any incompatibilities

: Large spill

## Section 8. Exposure controls/personal protection

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	:	Hygiene measures
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.	:	Eye/face protection
Skin protection		
Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.	:	Hand protection
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	:	Body protection
Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	:	Other skin protection
Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.	:	Respiratory protection

# Section 9. Physical and chemical properties and safety characteristics

Appearance				
Liquid.			:	Physical state
White.			:	Color
Characteristic.			:	Odor
Not available.			:	Odor threshold
8			:	рН
Not available.			:	Melting point/freezing point
Not available.			:	Boiling point
Closed cup: 105°C (221°F)			:	Flash point
Not available.			:	Evaporation rate
Not available.			:	Flammability
Greatest known range: Lower: propanol)	1.1% Upper: 14% ((2-meth	oxymethylethoxy)	:	Lower and upper explosion limit/flammability limit
Not available.			:	Vapor pressure
Highest known value: 5.1 (Air monobutyl ether). Weighted av		lymer with oxirane,	:	Relative vapor density
Not available.			:	Relative density
Easily soluble in the following n	naterials: cold water.		:	Solubility
Not available.			:	Partition coefficient: n- octanol/water
Not available.			:	Auto-ignition temperature
Date of issue/Date of revision	: 6-10-2022	Version	: 1.01

## Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Not available.

### <u>Mobility in soil</u>

## Section 12. Ecological information

Not available.

# : Soil/water partition coefficient (Koc)

No known significant effects or critical hazards.

: Other adverse effects

: Disposal methods

## Section 13. Disposal considerations

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

ΙΑΤΑ	IMDG	UN

#### FOR PROFESSIONAL USE ONLY

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
