

# **SAFETY DATA SHEET**

FRS-40/FLEX MATT BASE BLACK 001EW02/9539

### **Section 1. Identification**

GHS product identifier SDS code

: FRS-40/FLEX MATT BASE BLACK 001EW02/9539

: 40329539B

#### Relevant identified uses of the substance or mixture and uses advised against

|  | Identified uses                                |  |
|--|--|--|
| Paint. Professional use Industrial use                     |  |  |
|  | Uses advised against                           |  |
| All other uses   |  |  |
| Product use  | : Solvent borne coating for interior use.      |  |
| Supplier's details   |  |  |
| MAPAERO SAS<br>10, Avenue de la<br>09103 PAMIERS<br>France | •  |  |
| e-mail address   | : PSRA_PAMIERS@akzonobel.com                   |  |
| Emergency telephone<br>number (with hours of<br>operation) | : +33 (0)5 34 01 34 01<br>+33 (0)5 61 60 23 30 |  |

### Section 2. Hazards identification

Classification of the : FLAMMABLE LIQUIDS - Category 3 substance or mixture : SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3

### GHS label elements, including precautionary statements

| Hazard pictograms              |  |   |                           |
|--------------------------------|--|---|---------------------------|
| Signal word                    | : Warning  |   |                           |
| Hazard statements              | : H226 - Flammable liquid and<br>H336 - May cause drowsiness   | •   |                           |
| Precautionary statements       |  |   |                           |
| Prevention                     | : P210 - Keep away from heat,<br>P241 - Use explosion-proof el<br>P242 - Use non-sparking tool<br>P243 - Take action to prevent<br>P261 - Avoid breathing vapor. | ectrical, ventilating or lighting<br>s.<br>static discharges. |                           |
| Response                       | : P304 + P312 - IF INHALED: (  | Call a POISON CENTER or do                                    | octor if you feel unwell. |
| Date of issue/Date of revision | : 1-10-2022  | Version : 1   |                           |
| Date of previous issue         | : No previous validation   | 1/12  | AkzoNobel                 |

### Section 2. Hazards identification

- Storage
- Disposal

: P403 + P233 - Store in a well-ventilated place. Keep container tightly closed. P403 + P235 - Keep cool.

: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Other hazards which do not : None known. result in classification

# Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

| Ingredient name                 | %         | CAS number |
|---------------------------------|-----------|------------|
| n-butyl acetate                 | ≥25 - ≤50 | 123-86-4   |
| 2-methoxy-1-methylethyl acetate | ≤10       | 108-65-6   |
| xylene                          | <10       | 1330-20-7  |
| ethylbenzene                    | ≤3        | 100-41-4   |
| methyl methacrylate             | ≤0.3      | 80-62-6    |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Chemical formula

: Not applicable.

### Section 4. First aid measures

### Description of necessary first aid measures

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.  |
|--------------|---|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If it is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. If not breathing, if breathing is irregular<br>or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give mouth-to-mouth<br>resuscitation. Get medical attention. If necessary, call a poison center or physician.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband.   |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention. If necessary, call a poison center or physician. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |

#### Most important symptoms/effects, acute and delayed

### Potential acute health effects

Eye contact

: No known significant effects or critical hazards.

| Date of issue/Date of revision | : 1-10-2022              | Version :1 |           |
|--------------------------------|--------------------------|------------|-----------|
| Date of previous issue         | : No previous validation | 2/12       | AkzoNobel |

### Section 4. First aid measures

| Inhalation          | : Can cause central nervous system (CNS) depression. May cause drowsiness or<br>dizziness.  |
|---------------------|---|
| Skin contact        | : No known significant effects or critical hazards.   |
| Ingestion           | : Can cause central nervous system (CNS) depression.  |
| Over-exposure signs | /symptoms   |
| Eye contact         | : No specific data.   |
| Inhalation          | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact        | : No specific data.   |
| Ingestion           | : No specific data.   |
|                     |   |

### Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>  |
|----------------------------|--|
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

# **Section 5. Fire-fighting measures**

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion.  |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures : No action shall be taken involving any personal risk or without suitable training. For non-emergency Evacuate surrounding areas. Keep unnecessary and unprotected personnel from personnel entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". **Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Methods and materials for containment and cleaning up Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and Large spill explosion-proof equipment. Approach release from upwind. Prevent entry into

explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

| Precautions for safe handling  |   |  |  |
|--|---|--|--|
| Protective measures :  | Put on appropriate personal protective<br>Avoid contact with eyes, skin and cloth<br>with adequate ventilation. Wear appro-<br>inadequate. Do not enter storage area<br>ventilated. Keep in the original contain<br>compatible material, kept tightly closed<br>heat, sparks, open flame or any other i<br>(ventilating, lighting and material handl<br>Take precautionary measures against<br>retain product residue and can be haza   | ing. Avoid breathing vapor of<br>priate respirator when ventila<br>is and confined spaces unless<br>her or an approved alternative<br>when not in use. Store and<br>gnition source. Use explosion<br>ing) equipment. Use only no<br>electrostatic discharges. Em | or mist. Use only<br>ation is<br>as adequately<br>a made from a<br>use away from<br>on-proof electrical<br>on-sparking tools.<br>opty containers |
| Advice on general :<br>occupational hygiene                          | Eating, drinking and smoking should be<br>handled, stored and processed. Work<br>eating, drinking and smoking. Remove<br>equipment before entering eating area<br>information on hygiene measures.  | ers should wash hands and f<br>e contaminated clothing and   | ace before<br>protective   |
| Conditions for safe storage, :<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |  |  |
| Date of issue/Date of revision                                       | : 1-10-2022   | Version : 1  |  |
| Date of previous issue   | : No previous validation  | 4/12   | AkzoNobel  |

# Section 8. Exposure controls/personal protection

### **Control parameters**

### **Occupational exposure limits**

| Ingredient name                   | Exposure limits   |
|-----------------------------------|---|
| n-butyl acetate                   | Workplace Safety and Health Act<br>(Singapore, 2/2006).<br>PEL (short term): 950 mg/m <sup>3</sup> 15 minutes.<br>PEL (short term): 200 ppm 15 minutes.<br>PEL (long term): 713 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 150 ppm 8 hours.   |
| xylene                            | Workplace Safety and Health Act<br>(Singapore, 2/2006).<br>PEL (short term): 651 mg/m <sup>3</sup> 15 minutes.<br>PEL (short term): 150 ppm 15 minutes.<br>PEL (long term): 434 mg/m <sup>3</sup> 8 hours.  |
| ethylbenzene                      | PEL (long term): 100 ppm 8 hours.<br><b>Workplace Safety and Health Act</b><br><b>(Singapore, 2/2006).</b><br>PEL (short term): 543 mg/m <sup>3</sup> 15 minutes.<br>PEL (short term): 125 ppm 15 minutes.<br>PEL (long term): 434 mg/m <sup>3</sup> 8 hours.   |
| methyl methacrylate               | PEL (long term): 100 ppm 8 hours.<br><b>Workplace Safety and Health Act</b><br><b>(Singapore, 2/2006).</b><br>PEL (long term): 410 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 100 ppm 8 hours.  |
| ppropriate engineering<br>ontrols | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering control also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| invironmental exposure<br>ontrols | : Emissions from ventilation or work process equipment should be checked to ensur<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |
| ndividual protection measu        | Ires  |
| Hygiene measures                  | : Wash hands, forearms and face thoroughly after handling chemical products, befo eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection               | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                   |   |
| Hand protection                   | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicate<br>this is necessary. Considering the parameters specified by the glove manufacturer<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |

| Date of issue/Date of revision | : 1-10-2022              | Version : 1 |           |
|--------------------------------|--------------------------|-------------|-----------|
| Date of previous issue         | : No previous validation | 5/12        | AkzoNobel |

# Section 8. Exposure controls/personal protection

| -                      |   |
|------------------------|---|
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

# **Section 9. Physical and chemical properties**

| <u>Appearance</u>                               |   |   |

### Section 11. Toxicological information

#### Ingestion

: Can cause central nervous system (CNS) depression.

### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : No specific data.   |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact | : No specific data.   |
| Ingestion    | : No specific data.   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>     |   |
|--------------------------------|---|
| Potential immediate effects    | : Not available.                                    |
