# Section 2. Hazards identification

Classification of the substance or mixture : AMMABLE LIQUIDS - Category 3 SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A CARCINOGENICITY - Category 2 SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -Category 3

## GHS label elements, including precautionary statements

 

 Signal word
 : Warning

 Hazard statements
 : ▶226 - Flammable liquid and vapor. H319 - Causes serious eye irritation.

 H226
 May asymptotic and causing and distribution.

H336 - May cause drowsiness or dizziness.

H351 - Suspected of causing cancer.

## Precautionary statements

Hazard pictograms

| Date of issue/Date of revision | : 5-10-2022 | Version : 2 |           |
|--------------------------------|-------------|-------------|-----------|
| Date of previous issue         | : 1-10-2022 | 1/13        | AkzoNobel |

## Section 2. Hazards identification

| Prevention | : P201 - Obtain special instructions before use.  |
|------------|---|
|            | P280 - Wear protective gloves, protective clothing and eye or face protection.  |
|            | P210 - Keep away from heat, sparks and hot surfaces. No smoking.  |
|            | P241 - Use explosion-proof electrical, ventilating or lighting equipment.   |
|            | P242 - Use non-sparking tools.  |
|            | P243 - Take action to prevent static discharges.<br>P261 - Avoid breathing vapor.   |
| Response   | <ul> <li>P308 + P313 - IF exposed or concerned: Get medical advice or attention.</li> <li>P304 + P312 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
| Storage    | P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.<br>P403 + P235 - Keep cool.  |
| Disposal   | <ul> <li>P501 - Dispose of contents and container in accordance with all local, regional,<br/>national and international regulations.</li> </ul>  |

Other hazards which do not : None known.

result in classification

# Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

| Ingredient name                 | %         | CAS number |
|---------------------------------|-----------|------------|
| n-butyl acetate                 | ≥25 - ≤50 | 123-86-4   |
| 2-methoxy-1-methylethyl acetate | ≥10 - ≤25 | 108-65-6   |
| xylene                          | <10       | 1330-20-7  |
| 4-methylpentan-2-one            | ≤5        | 108-10-1   |
| ethylbenzene                    | ≤3        | 100-41-4   |
| methyl methacrylate             | <1        | 80-62-6    |
| 4-morpholinecarbaldehyde        | <1        | 4394-85-8  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Chemical formula

Date of previous issue

: Not applicable.

## Description of necessary first aid measures

Section 4. First aid measures

| Eye contact                    |  | es with plenty of water, occasionally lifting the upper and lower<br>nd remove any contact lenses. Continue to rinse for at least 10<br>Il attention.   |
|--------------------------------|--|---|
| Inhalation                     | If it is suspected that<br>mask or self-containe<br>or if respiratory arrest<br>personnel. It may be<br>resuscitation. Get ma<br>If unconscious, place | sh air and keep at rest in a position comfortable for breathing.<br>fumes are still present, the rescuer should wear an appropriate<br>ed breathing apparatus. If not breathing, if breathing is irregular<br>t occurs, provide artificial respiration or oxygen by trained<br>dangerous to the person providing aid to give mouth-to-mouth<br>edical attention. If necessary, call a poison center or physician.<br>in recovery position and get medical attention immediately.<br>vay. Loosen tight clothing such as a collar, tie, belt or |
| Skin contact                   | shoes. Continue to r   | skin with plenty of water. Remove contaminated clothing and inse for at least 10 minutes. Get medical attention. Wash . Clean shoes thoroughly before reuse.  |
| Date of issue/Date of revision | : 5-10-2022  | Version : 2   |

2/13

**AkzoNobe** 

| Section 4. First aid measures |   |  |
|-------------------------------|---|--|
| Ingestion                     | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical |  |

ersonnel. If vomiting occurs, ter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

## Most important symptoms/effects, acute and delayed

| Most important symptoms/e  | ects, acute and delayed   |  |
|--|---|--|
| Potential acute health effe  | <u>è</u>  |  |
| Eye contact  | : Causes serious eye irritation.  |  |
| Inhalation   | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.   |  |
| Skin contact   | : No known significant effects or critical hazards.   |  |
| Ingestion  | : Can cause central nervous system (CNS) depression.  |  |
| <u>Over-exposure signs/symp</u>  | u <u>ms</u>   |  |
| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |  |
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness   |  |
| Skin contact   | : No specific data.   |  |
| Ingestion  | : No specific data.   |  |
| Indication of immediate medical attention and special treatment needed, if necessary |   |  |
| Notes to physician   | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |  |
| Specific treatments  | : No specific treatment.  |  |
| Protection of first-aiders   | : No action shall be taken involving any personal risk or without suitable training. It is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |  |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media               | : Vse dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media             | : Do not use water jet.  |
| Specific hazards arising from the chemical | : Fammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. |

| Date of issue/Date of revision | : 5-10-2022 | Version : 2 |           |
|--------------------------------|-------------|-------------|-----------|
| Date of previous issue         | : 1-10-2022 | 3/13        | AkzoNobel |

.....

# Section 5. Fire-fighting measures

| •   |  |
|---|--|
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
| Special protective actions<br>for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective<br>equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |

# Section 6. Accidental release measures

| Personal precautions, protect  | tiv | e equipment and emergency procedures  |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental procautions      |     | Avoid dispersal of spilled material and runoff and contact with soil, waterways   |

.

**ronmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal |

# Section 7. Handling and storage

## Precautions for safe handling

| Protective measures : | Fut on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Do not get in eyes or on skin or clothing. Do not<br>ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear<br>appropriate respirator when ventilation is inadequate. Do not enter storage areas<br>and confined spaces unless adequately ventilated. Keep in the original container or<br>an approved alternative made from a compatible material, kept tightly closed when<br>not in use. Store and use away from heat, sparks, open flame or any other ignition<br>source. Use explosion-proof electrical (ventilating, lighting and material handling)<br>equipment. Use only non-sparking tools. Take precautionary measures against |
|-----------------------|---|
|-----------------------|---|

| Date of issue/Date of revision | : 5-10-2022 | Version : 2 |
|--------------------------------|-------------|-------------|
| Date of previous issue         | : 1-10-2022 | 4/13        |

# Section 7. Handling and storage

|  | electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.  |
|--|--|
| Advice on general con general con general con general con general con a construction of the second s | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage, including any incompatibilities   | Store in accordance with local regulations. Store in a segregated and approved<br>area. Store in original container protected from direct sunlight in a dry, cool and well-<br>ventilated area, away from incompatible materials (see Section 10) and food and<br>drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing<br>materials. Keep container tightly closed and sealed until ready for use. Containers<br>that have been opened must be carefully resealed and kept upright to prevent<br>leakage. Do not store in unlabeled containers. Use appropriate containment to<br>avoid environmental contamination. See Section 10 for incompatible materials<br>before handling or use. |

# Section 8. Exposure controls/personal protection

## **Control parameters**

### **Occupational exposure limits**

| Ingredient name      | Exposure limits  |
|----------------------|--|
| n-butyl acetate      | Workplace Safety and Health Act  |
|                      | (Singapore, 2/2006).   |
|                      | PEL (short term): 950 mg/m <sup>3</sup> 15 minutes.                                  |
|                      | PEL (short term): 200 ppm 15 minutes.  |
|                      | PEL (long term): 713 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 150 ppm 8 hours. |
| xylene               | Workplace Safety and Health Act  |
| xylerie              | (Singapore, 2/2006).   |
|                      | PEL (short term): 651 mg/m <sup>3</sup> 15 minutes.                                  |
|                      | PEL (short term): 001 mg/m 10 minutes.   |
|                      | PEL (long term): 434 mg/m <sup>3</sup> 8 hours.                                      |
|                      | PEL (long term): 100 ppm 8 hours.  |
| 4-methylpentan-2-one | Workplace Safety and Health Act  |
|                      | (Singapore, 2/2006).   |
|                      | PEL (short term): 307 mg/m <sup>3</sup> 15 minutes.                                  |
|                      | PEL (short term): 75 ppm 15 minutes.   |
|                      | PEL (long term): 205 mg/m <sup>3</sup> 8 hours.                                      |
|                      | PEL (long term): 50 ppm 8 hours.   |
| ethylbenzene         | Workplace Safety and Health Act  |
|                      | (Singapore, 2/2006).   |
|                      | PEL (short term): 543 mg/m <sup>3</sup> 15 minutes.                                  |
|                      | PEL (short term): 125 ppm 15 minutes.  |
|                      | PEL (long term): 434 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 100 ppm 8 hours. |
| methyl methacrylate  | Workplace Safety and Health Act  |
|                      | (Singapore, 2/2006).   |
|                      | PEL (long term): 410 mg/m <sup>3</sup> 8 hours.                                      |
|                      | PEL (long term): 100 ppm 8 hours.  |
|                      |  |

# Appropriate engineering controls

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

| Date of issue/Date of revision | : 5-10-2022 | Version : 2 |           |
|--------------------------------|-------------|-------------|-----------|
| Date of previous issue         | : 1-10-2022 | 5/13        | AkzoNobel |

# Section 8. Exposure controls/personal protection

| Environmental exposure<br>controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
|------------------------------------|---|
| Individual protection measured     | ires  |
| Hygiene measures                   | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection                | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                    |   |
| Hand protection                    | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Body protection                    | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection              | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection             | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

# Section 9. Physical and chemical properties

| Appearance                                      |   |
|---|---|
| Physical state                                  | : 🗹 quid.   |
| Color   | : Colorless.  |
| Odor  | : Characteristic.   |
| Odor threshold                                  | : Not available.  |
| рН  | : Not available.  |
| Melting point/freezing point                    | : Not available.  |

## Persistence/degradability

Not available.

## **Bioaccumulative potential**

| Product/ingredient name         | LogPow | BCF         | Potential |
|---------------------------------|--------|-------------|-----------|
| n-butyl acetate                 | 2.3    | -           | low       |
| 2-methoxy-1-methylethyl acetate | 1.2    | -           | low       |
| xylene                          | 3.12   | 8.1 to 25.9 | low       |
| 4-methylpentan-2-one            | 1.9    | -           | low       |
| ethylbenzene                    | 3.6    | -           | low       |
| methyl methacrylate             | 1.38   | -           | low       |
| 4-morpholinecarbaldehyde        | -      | <1.9        | low       |

## <u>Mobility in soil</u>

Soil/water partition coefficient (Koc)

: Not available.

### Other adverse effects

: No known significant effects or critical hazards.

# Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information
