

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878

# **SAFETY DATA SHEET**

THINNER P THINNER

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product i | identifier |
|---------------|------------|
|---------------|------------|

| Product name | : THINNER P THINNER |
|--------------|---------------------|
| SDS code     | : 51700000X         |

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|  |           | Identified uses      |
|--|-----------|----------------------|
| Thinner. Professional use Industrial use |           |                      |
|  |           | Uses advised against |
| All other uses                           |           |                      |
| Product use                              | : Thinner |                      |

### 1.3 Details of the supplier of the safety data sheet

MAPAERO SAS

10, Avenue de la Rijole CS30098 09103 PAMIERS Cedex France address of person : PSRA PAMIERS@akzonobel.com

e-mail address of person : F responsible for this SDS

### 1.4 Emergency telephone number

| National advisory body/Poison Center |  |  |
|--------------------------------------|--|--|
| Telephone number                     | : (12) 411 99 99                               |  |
| <u>Supplier</u>                      |  |  |
| Telephone number                     | : +33 (0)5 34 01 34 01<br>+33 (0)5 61 60 23 30 |  |
| Hours of operation                   | :  |  |

## **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

Product definition : Mixture

### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 2, H225 Eye Irrit. 2, H319

STOT SE 3, H336

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

| Date of issue/Date of revision | : 5-10-2022 | Version : 2 |           |
|--------------------------------|-------------|-------------|-----------|
| Date of previous issue         | : 1-10-2022 | 1/17        | AkzoNobel |

## **SECTION 2: Hazards identification**

| 2.2 Label elements  |    |   |
|---|----|---|
| Hazard pictograms   | :  | $\wedge$ $\wedge$   |
|   |    |   |
| Signal word   | :  | Danger  |
| Hazard statements   | :  | Highly flammable liquid and vapor.<br>Causes serious eye irritation.<br>May cause drowsiness or dizziness.  |
| Precautionary statements  |    | -   |
| Prevention  | :  | Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing vapor.  |
| Response  | :  | IF INHALED: Call a POISON CENTER or doctor if you feel unwell. IF IN EYES:<br>Rinse cautiously with water for several minutes. Remove contact lenses, if present<br>and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or<br>attention. |
| Storage   | :  | Store in a well-ventilated place. Keep container tightly closed. Keep cool.   |
| Disposal  | :  | Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazardous ingredients   | :  | n-butyl acetate<br>ethyl acetate<br>2-methoxy-1-methylethyl acetate   |
| Supplemental label<br>elements  | :  | Repeated exposure may cause skin dryness or cracking.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :  | Not applicable.   |
| Special packaging requirem  | en | <u>ts</u>   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :  | Not applicable.   |
| Tactile warning of danger   | :  | Not applicable.   |
| 2.3 Other hazards   |    |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :  | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | :  | None known.   |
|   |    | an/information on ingradiants   |

## **SECTION 3: Composition/information on ingredients**

3.2 Mixtures

: Mixture

| Product/ingredient name         | Identifiers   | %         | Regulation (EC) No.<br>1272/2008 [CLP]  | Туре    |
|---------------------------------|---|-----------|---|---------|

**SECTION 3: Composition/information on ingredients** 

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

| Eye contact                    | : Immediately flush eyes with plen<br>eyelids. Check for and remove<br>minutes. Get medical attention.  | any contact lenses. Contin   |  |
|--------------------------------|---|--|--|
| Inhalation                     | : Remove victim to fresh air and I<br>If it is suspected that fumes are<br>mask or self-contained breathin<br>or if respiratory arrest occurs, pr<br>personnel. It may be dangerous<br>resuscitation. Get medical atter<br>If unconscious, place in recover<br>Maintain an open airway. Loose<br>waistband. | still present, the rescuer sh<br>ig apparatus. If not breathin<br>rovide artificial respiration o<br>s to the person providing aid<br>ntion. If necessary, call a po<br>y position and get medical a | nould wear an appropriate<br>ng, if breathing is irregular<br>or oxygen by trained<br>d to give mouth-to-mouth<br>oison center or physician.<br>attention immediately. |
| Skin contact                   | : Wash skin thoroughly with soap<br>Remove contaminated clothing<br>Wash clothing before reuse. Cl  | and shoes. Get medical at  | tention if symptoms occur.   |
| Ingestion                      | : Wash out mouth with water. Re<br>and keep at rest in a position co<br>swallowed and the exposed per<br>drink. Stop if the exposed perso<br>induce vomiting unless directed<br>the head should be kept low so<br>attention. If necessary, call a po<br>mouth to an unconscious perso                       | omfortable for breathing. If i<br>son is conscious, give smal<br>on feels sick as vomiting ma<br>to do so by medical person<br>that vomit does not enter th<br>oison center or physician.            | material has been<br>Il quantities of water to<br>ay be dangerous. Do not<br>nnel. If vomiting occurs,<br>ne lungs. Get medical<br>Never give anything by              |
| Date of issue/Date of revision | : 5-10-2022   | Version : 2  |  |
| Date of previous issue         | : 1-10-2022   | 3/17   | AkzoNobel  |

### SECTION 4: First aid measures

|                            | medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
|----------------------------|--|
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

### 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### **Over-exposure signs/symptoms**

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking  |
| Ingestion    | : No specific data.   |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large |
|---------------------|---|
|                     | quantities have been ingested or inhaled.   |
| Specific treatments | : No specific treatment.  |

### SECTION 5: Firefighting measures

| 5.1 Extinguishing media        |  |
|--------------------------------|--|
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

### 5.2 Special hazards arising from the substance or mixture

| Date of issue/Date of revision | : 5-10-2022 | Version : 2 |          |
|--------------------------------|-------------|-------------|----------|
| Date of previous issue         | : 1-10-2022 | 4/17        | AkzoNobe |

| SECTION 5: Firefighting measures               |   |  |  |
|--|---|--|--|
| Hazards from the substance or mixture          | : Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.  |  |  |
| Hazardous combustion products                  | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |  |  |
| 5.3 Advice for firefighters                    |   |  |  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |  |  |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |  |  |

### **SECTION 6: Accidental release measures**

### 6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel  | :    | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |
|---------------------------------|------|--|
| For emergency responders        | :    | If specialized clothing is required to deal with the spillage, take note of any<br>information in Section 8 on suitable and unsuitable materials. See also the<br>information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | :    | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and materials fo    | or c | ontainment and cleaning up   |
| Small spill                     | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. |
| 6.4 Reference to other sections | :    | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use only<br>with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### Seveso Directive - Reporting thresholds

#### Danger criteria

|     | Notification and MAPP threshold | Safety report threshold |
|-----|---------------------------------|-------------------------|
| P5c | 5000 tonne                      | 50000 tonne             |

### 7.3 Specific end use(s)

| Recommendations            | : Not available. |
|----------------------------|------------------|
| Industrial sector specific | : Not available. |
| solutions                  |                  |

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

### Occupational exposure limits

| Product/ingredient name        |             | Exposure limit values   |           |  |
|--------------------------------|-------------|---|-----------|--|
| ethyl acetate                  |             | Regulation of the Minister of Family, Labor and Social Policy<br>of 12 June 2018, regarding the highest permissible<br>concentrations and values of agents harmful to health in the<br>work environment (J of Laws 2018, item 1286) (Poland, 7/2018)<br>STEL: 720 mg/m³ 15 minutes.<br>TWA: 240 mg/m³ 8 hours.Regulation of the Minister of Family, Labor and Social Policy<br>of 12 June 2018, regarding the highest permissible<br>concentrations and values of agents harmful to health in the |           |  |
| Date of issue/Date of revision | : 5-10-2022 | Version :2  |           |  |

### PNECs

No PNECs available.

### 8.2 Exposure controls

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

### Individual protection measures

- Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products,<br/>before eating, smoking and using the lavatory and at the end of the working period.<br/>Appropriate techniques should be used to remove potentially contaminated clothing.<br/>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br/>safety showers are close to the workstation location.
- **Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

### Skin protection

- Hand protection
- : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time >480 minutes according to EN374) is recommended. Recommended gloves: Viton ® or Nitrile, thickness  $\geq$  0.38 mm. When only brief contact is expected, a glove with protection class of 2 or higher (breakthrough time >30 minutes according to EN374) is recommended. Recommended gloves: Nitrile, thickness  $\geq$  0.12 mm.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

The performance or effectiveness of the glove may be reduced by physical/ chemical damage and poor maintenance.

The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.

## **SECTION 8: Exposure controls/personal protection**

| Body protection                 | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods. |
|---------------------------------|--|
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be<br>selected based on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.  |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |

## **SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                               |   |       |
|---|---|-------|
| Physical state                                  | Liquid.   |       |
| Color   | Colorless.  |       |
| Odor  | Characteristic.   |       |
| Odor threshold                                  | Not available.  |       |
| рН  | Not available.  |       |
| Melting point/freezing point                    | Not available.  |       |
| Initial boiling point and                       | Not available.  |       |
| boiling range                                   |   |       |
| Flash point                                     | Closed cup: 17°C  |       |
| Evaporation rate                                | Not available.  |       |
| Flammability (solid, gas)                       | Not available.  |       |
| Upper/lower flammability or<br>explosive limits | Not available.  |       |
| Vapor pressure                                  | Not available.  |       |
| Vapor density                                   | Highest known value: 4.6 (Air = 1) (2-methoxy-1-methylethyl acet.<br>Weighted average: 3.85 (Air = 1) | ate). |
| Density   | 0.907 g/cm <sup>3</sup>   |       |
| Solubility(ies)                                 | Insoluble in the following materials: cold water.   |       |
| Partition coefficient: n-octanol/<br>water      | Not available.  |       |
| Auto-ignition temperature                       | Not available.  |       |
| Decomposition temperature                       | Not available.  |       |
| Viscosity                                       | Kinematic (room temperature): 0.11 cm²/s<br>Kinematic (40°C): 0.06 cm²/s                              |       |

| <b>SECTION 10: Stabilit</b>                | y and reactivity  |
|--|---|
| 10.1 Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.  |
| 10.2 Chemical stability                    | : The product is stable.  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                   | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| 10.5 Incompatible materials                | : Reactive or incompatible with the following materials: oxidizing materials  |
| 10.6 Hazardous<br>decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

## **SECTION 11: Toxicological information**

### 11.1 Information on toxicological effects

### Acute toxicity

| Product/ingredient name | Result                | Species    | Dose                | Exposure |
|-------------------------|-----------------------|------------|---------------------|----------|
| n-butyl acetate         | LC50 Inhalation Gas.  | Rat        | 390 ppm             | 4 hours  |
| -                       | LC50 Inhalation Vapor | Mouse      | 6 g/m <sup>3</sup>  | 2 hours  |
|                         | LD50 Dermal           | Rabbit     | >17600 mg/kg        | -        |
|                         | LD50 Intraperitoneal  | Mouse      | 1230 mg/kg          | -        |
|                         | LD50 Oral             | Guinea pig | 4700 mg/kg          | -        |
|                         | LD50 Oral             | Mouse      | 6 g/kg              | -        |
|                         | LD50 Oral             | Rabbit     | 3200 mg/kg          | -        |
|                         | LD50 Oral             | Rat        | 10768 mg/kg         | -        |
| ethyl acetate           | LC50 Inhalation Gas.  | Rat        | 1600 ppm            | 8 hours  |
|                         | LC50 Inhalation Vapor | Mouse      | 45 g/m <sup>3</sup> | 2 hours  |
|                         | LD50 Intraperitoneal  | Mouse      | 709 mg/kg           | -        |
|                         | LD50 Oral             | Guinea pig | 5.5 g/kg            | -        |

## **SECTION 11: Toxicological information**

**Conclusion/Summary** : Not available.

Teratogenicity

**Conclusion/Summary** : Not available.

### Specific target organ toxicity (single exposure)

| Product/ingredient name         | Category   | Route of exposure | Target organs    |
|---------------------------------|------------|-------------------|------------------|
| n-butyl acetate                 | Category 3 | -                 | Narcotic effects |
| ethyl acetate                   | Category 3 | -                 | Narcotic effects |
| 2-methoxy-1-methylethyl acetate | Category 3 | -                 | Narcotic effects |

### Specific target organ toxicity (repeated exposure)

Not available.

### Aspiration hazard

Not available.

| Information on the likely routes of exposure | : | Not available.  |
|--|---|---|
| Potential acute health effects               |   |   |
| Eye contact                                  | : | Causes serious eye irritation.  |
| Inhalation                                   | : | Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. |
| Skin contact                                 | : | Defatting to the skin. May cause skin dryness and irritation.                         |
| Ingestion                                    | : | Can cause central nervous system (CNS) depression.                                    |

### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking  |
| Ingestion    | : No specific data.   |

## **SECTION 12: Ecological information**

### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is not classified as hazardous to the environment.

| Product/ingredient name | Result                              | Species                                | Exposure |
|-------------------------|-------------------------------------|--|----------|
| n-butyl acetate         | Acute LC50 32 mg/l Marine water     | Crustaceans - Artemia salina           | 48 hours |
|                         | Acute LC50 100000 µg/l Fresh water  | Fish - Lepomis macrochirus             | 96 hours |
|                         | Acute LC50 18000 µg/l Fresh water   | Fish - Pimephales promelas             | 96 hours |
|                         | Acute LC50 185000 µg/l Marine water | Fish - Menidia beryllina               | 96 hours |
|                         | Acute LC50 62000 µg/l Fresh water   | Fish - Danio rerio                     | 96 hours |
| ethyl acetate           | Acute EC50 2500000 µg/l Fresh water | Algae - Selenastrum sp.                | 96 hours |
|                         | Acute LC50 1600000 µg/l Fresh water | Crustaceans - Asellus aquaticus        | 48 hours |
|                         | Acute LC50 750000 µg/l Fresh water  | Crustaceans - Gammarus pulex           | 48 hours |
|                         | Acute LC50 175000 µg/l Fresh water  | Daphnia - Daphnia cucullata            | 48 hours |
|                         | Acute LC50 154000 µg/l Fresh water  | Daphnia - Daphnia cucullata            | 48 hours |
|                         | Acute LC50 560000 µg/l Fresh water  | Daphnia - Daphnia magna                | 48 hours |

### **SECTION 12: Ecological information**

| 12.4 Mobility in soil                  |                  |
|--|------------------|
| Soil/water partition coefficient (Koc) | : Not available. |
| Mobility                               | : Not available. |

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

### **12.6 Other adverse effects** : No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

| <u>Product</u>          |  |
|-------------------------|--|
| Methods of disposal     | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste         | : The classification of the product may meet the criteria for a hazardous waste.   |
| Disposal considerations | : Do not allow to enter drains or watercourses.<br>Dispose of according to all federal, state and local applicable regulations.<br>If this product is mixed with other wastes, the original waste product code may no<br>longer apply and the appropriate code should be assigned.<br>For further information, contact your local waste authority.   |

### European waste catalogue (EWC)

The European Waste Catalogue classification of this product, when disposed of as waste, is:

| Waste code              | Waste designation  |
|-------------------------|--|
| <b>E</b> WC 08 01 99    | wastes not otherwise specified   |
| Packaging               |  |
| Methods of disposal     | : The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.   |
| Disposal considerations | <ul> <li>Using information provided in this safety data sheet, advice should be obtained from<br/>the relevant waste authority on the classification of empty containers.<br/>Empty containers must be scrapped or reconditioned.<br/>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions.</li> </ul>  |
| Special precautions     | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 THINNER P THINNER
